Objective

Full Stack Developer with 2 years of experience in JavaScript frameworks and cloud, proficient in both server-side and client-side development, seeking a full-time opportunity within the organization.

Skills

Technical Skills: Proficient in OOPS, Java, Python, HTML5, CSS, JavaScript, TypeScript, NodeJS, React, Angular, NextJS, NestJS, ExpressJS, AWS, Redis, MongoDB, MySQL, RestApis, Git, Linux, Docker, and PostgreSQL.

Soft Skills: Demonstrated adaptability, problem-solving, collaboration, and effective communication abilities.

Work Experience

Kandra Digitals | Full Stack Developer

Oct 2022 – present

- A complete web and digital portfolio solution for business', including websites, applications and marketing strategies to help them succeed in their industries.
- Crafting and implementing user-friendly platforms tailored to meet organizational needs, ensuring seamless deployment and optimal user experience

Dataactor Informatics | Intern

Dec 2019 – Jan 2020

- Developed XML transformation processes to convert raw data into XML format for e-magazine publication.

Projects

B-Hero (Real time C to C blood donation platform)

Aug'24 – Nov'2024

- Developed a location-based blood request system with real-time notifications, connecting donors and recipients seamlessly using **Google Maps Api**, **React-Native**, **NestJS**, and **MongoDB**.
- Implemented a payment system to reduce fake requests and a digital certification module to motivate and recognize donors.
- Developed a robust **admin dashboard** to manage user accounts, monitor payments, and oversee platform operations efficiently.

Maps (Link)

Dec'24

Designed and developed a Google Maps clone using **Next.js**, **Leaflet**, and **Python**, enabling users to select locations and calculate shortest paths within Bengaluru using the **OSMnx library**.

- Built a responsive UI and integrated a Python backend for route computations, ensuring seamless API communication and accurate real-time routing visualization.

Education

St. Francis College, MCA (Masters in Computer application)

Positions of Responsibility

Project Coordinator

Nov'23 - Present

- Organized project plans and delegated tasks to team members, ensuring effective project execution.

E-spectra / Club | Technical Head (Academics)

Jun'21 - Jun'23

- Involved in planning and executing national level events at our college as Tech head successfully held various activities for student Entrepreneurship skills and Technical Knowledge

Certifications

AWS Certified Cloud Practitioner - Issued by Amazon Web Services (AWS)

Valid Until: July 12, 2027, Issued On: December 2024

Validation Number: 49f3731e28264231ba58364f350ba801
